

Property Sauce operations: open questions

Every question the fourteen Ops chats left for Damian, taken from section 10 of each procedure file on 20 September 2026. Answer in any order; each answer goes back into the file for that operation.

Ops 01: Vacant property to let

1. **No money before signing.** The office spreadsheet's step 5 takes a holding deposit before referencing. Damian's rule today is that nothing is requested until the agreement is signed, which also matches the Renters' Rights Act's advance-rent rule. This file follows Damian. Confirm the spreadsheet is retired and the office told.
2. **Rauf.** Named today for London viewings. He has no Slack account, Zoho Team record or number on file. Supply them, or say whether Vera covers London until then. Also confirm "Rauf" is the spelling.
3. **Other areas.** Blackpool, Saffron Walden (Sky) and Essex were not mentioned. Who views there?
4. **Lancaster House.** Damian said Dave and Ali for Newcastle today; Ops 09 has an open conflict between Dave and Ali for turnarounds. Assumed both can view and the thread post tags whoever is free first. Confirm.
5. **Income test.** [30] times the monthly rent in gross annual income, [36] with a guarantor, proposed as the pre-qualification line. Confirm the multiples, and the rule for applicants on benefits (guarantor, or a rent-in-advance arrangement within the one-month limit).
6. **Applicant status.** Add "Applicant" to the Tenant `Status` picklist (Ops 03 open question 4) so the database is a filter rather than a note search. Confirm, and Ops 03's chat or this one adds it.
7. **Let Agreed on the Landlord record.** Confirm the Landlord `Status` picklist has (or should have) Let Agreed between To Let and Rented.
8. **Browser access.** OpenRent and Homelet have no connectors. Should Claude post ads and order references in Chrome on the office logins, with the action reported in the thread each time, or does a person keep those two clicks?
9. **DocuSign account.** The connector signs in as Usman (info@propertysauce.co) on the "Damian Murray" account. Envelopes will be sent from that user. Confirm that is right, and whether the templates should be saved in DocuSign so the tabs (signature, date, initials) are fixed rather than placed each time.
10. **Deposit scheme.** Damian said Mydeposits today; Ops 09 records Mydeposits or TDS on existing records. New lets go to Mydeposits unless told otherwise. Confirm.
11. **Database age.** Six months since last contact proposed as the cut-off for re-contacting an old applicant without a fresh E1. Confirm.
12. **Runner-up hold.** Fourteen days proposed for holding the second applicant's documents. Confirm.
13. **Rightmove and Zoopla.** Named in the scope line but not used today. Leave out until Damian says otherwise?

14. **Law check.** The advance-rent and rental-bidding points in section 3 are from summaries of the Renters' Rights Act 2025, not the Act. Re-read on legislation.gov.uk before the first live let and correct this file if needed.
15. **Third-party landlords.** For a property whose Established Landlord is not one of ours, does the landlord sign the agreement on DocuSign as recipient 1, or does Sure Lets and Manage Limited sign as agent? The template's landlord clause decides; confirm per landlord.

Ops 02: Tenant paperwork and due diligence

Not yet dictated; nothing written in the file.

Ops 03: Tenant enquiries

1. **Marchbank Vale wording.** Damian called them "our legal representatives". Marchbank & Vale Associates is an arrears recovery brand and must never be described as solicitors or legal representatives (Legal Services Act 2007 s.17). In anything a tenant sees: "instructed to recover the arrears". Confirm.
2. **Facebook pages.** Claude cannot create them. Damian creates the pages and grants Meta Business Suite access; Claude then writes the content (5g). Confirm the five page names.
3. **"Southwark Walden"** read as Saffron Walden (4 High Street; the Windmill Cottage properties in Sible Hedingham). Confirm.
4. **Where prospective tenants are stored.** Leads = Property is the acquisition pipeline, so tenant applicants need a home: a separate Zoho module, a picklist on Contacts ("Applicant"), or a Google Sheet per block. Recommendation: Contacts with `Tenancy_Type` or a new `Contact_Stage` picklist = Applicant, linked to the Landlord (property) record, so a successful applicant becomes the Tenant record without re-keying.
5. **Route planning.** No Google Maps connector is attached. Grouping by postcode district (E10, E11, E17, E4 together; CR0 and CR2 together) covers most of the benefit. Add Google Maps if drive-time optimisation is wanted.
6. **Photo storage.** Recommendation: Google Drive. Zoho CRM gives about 1GB of file storage per user and then charges per 5GB block; before and after photos across 160 properties would outgrow it. The Maintenance record holds the Drive link. Ops 05 has adopted this; confirm.
7. **Contractor diaries.** Do Rocky, Sky, Ali and Dave have Google calendars Claude can write to, or should one be created per contractor on admin@propertysauc.co and shared with them? Rocky and Dave also need Slack accounts and Zoho Team records before they can be booked automatically.
8. **Rent demands.** Are Zoho Books invoices going out for every tenant today with a due date matching the tenancy? Ops 04's chase keys off that invoice.
9. **Gas engineers per area.** `Gas_Safe_Engineer` on the Landlord record is blank on most properties. Who is the engineer for London, Saffron Walden, Rotherham, Cramlington and Blackpool?
10. **Reconcile the drafts.** Three chats drafted overlapping timetables on 17 September. Damian to pick one of each:
11. Arrears handover to Marchbank Vale: Ops 04 says day 21; this chat's draft (appendix A) says day 17.

12. Certificate lead time: Damian said 4 weeks; Ops 07 wrote 3 weeks; this chat recommends 8 weeks for gas (so a failed access visit does not push it past expiry, and a check done in months 10 to 12 keeps the original expiry date), 12 weeks for EICR and EPC, 16 weeks for licences.
13. Certificate list: Ops 07's register (5a there) and appendix B here agree on the core items; appendix B adds deposit protection, How to Rent, Right to Rent and buildings insurance as things Ops 03 gets asked about, and drops the block-only items (lifts, asbestos, extinguishers) to Ops 13.
14. **Compliance data.** The deep dive in appendix C found insurance and licence dates expired or blank on most records. Damian to say which are real gaps and which are block renewals never written back, before the compliance calendar is built from them.

Ops 04: Rent collection and arrears

Answered 17 September 2026: day numbers and day 21 handover confirmed; interest clause present in both templates (section 4); guarantors on some tenancies, deeds on file in Zoho CRM; Marchbank & Vale handles possession claims within the limits in 5c. Still open:

1. Who signs the day 30 route decision and the claim form when the landlord is one of Damian's own companies: Damian as director, or another named director?
2. Does Marchbank & Vale phone tenants as well as write, and from which number?
3. Which arrears fields exist on the Tenant record today (arrears balance, arrears stage, next action date, guarantor lookup, interest clause number)? To check in Zoho and add what is missing before the test week.
4. Which tenancy to use for the one-week test in section 9.

Ops 05: Maintenance jobs

1. Rocky and Dave: full names, mobile numbers, email addresses and whether they will use Slack and Google Calendar. Neither has a Team record in Zoho or a Slack account, so they cannot be booked or messaged automatically yet.
2. Authority limits in section 4: in-house labour £150 and materials £100 without asking. Confirm or change, and say whether any landlord has a different limit.
3. Photos: Drive as the permanent store with only a quick-view copy on the Zoho ticket. Confirm.
4. Should the "How to report a repair" text go into the tenancy agreement (Ops 02) as a clause, or only as the welcome email?
5. London inspections every six months and the other areas every three: confirm, and confirm Saffron Walden and Blackpool at six.
6. Out-of-hours emergencies: who takes the call today, and does Rocky, Ali or Dave attend out of hours?
7. Google Maps: add a connector for driving times, or accept straight-line grouping by postcode for now?
8. Awaab's Law and the Decent Homes Standard for private tenancies: watch for the commencement regulations and update the timescales in step 5 when they land.

Ops 06: Contractor payments and invoice checking

1. The intake address: bills@propertyysauce.co as proposed, or accounts@. Whichever it is, Damian adds it as an alias on admin@propertyysauce.co in Google Admin (Users, the user, Add alternate email); Claude cannot create aliases.
2. Section 4 limits: increases of up to £50 and 15 percent with evidence; £500 per job on Damian's behalf; 14-day terms. Confirm or change.
3. The list of owners who count as "ours" for approval on Damian's behalf: Damian, his wife (name to add), Sure Lets and Manage Limited, Beaucatt Homes, Beaumont Residential Ltd, Lancaster Residential Group Limited, Montrose Residential Group Limited, Murray & Sullivan. Any others, for example Crackle Property Ltd and 101 Fortitude Properties Ltd, which appear in Books as landlords receiving payouts.
4. Who is salaried and who invoices per job: Rocky is on a monthly salary; Ali, Dave, Sky and Vera to confirm. The in-house rate card for recharging labour to other landlords (hourly rate per person, minimum call-out) and the commission percentage in the `Quote_To_Landlord` and `Invoice_Amount` formulas.
5. Third-party landlords: is the default that Property Sauce pays the contractor and recharges through the statement, with "Landlord Direct" only where the agreement says so? Confirm, and confirm that management agreements allow deduction from rent.
6. The Virgin Money upload file layout: the bank's template links are dead (step 10). Damian to decide which of the three routes to use: ask the bank's live chat for the current CSV template from inside Business Internet Banking; allow a one-line test upload (a £1 payment to a Property Sauce account, not authorised) so the validation screen shows the expected columns; or both. Also whether a second user should authorise runs over a set amount. Faster Payments is settled: file upload only supports it.
7. The agreed rate card for each certificate provider: who they are per area (Ops 07 open question), their current prices, and any travel rule. Claude will email each one template C0 with their rates to confirm once Damian supplies the list.
8. Construction Industry Scheme: a lettings and management business paying trades is not normally a CIS contractor unless it is a "deemed contractor" (over £3 million of construction spend in a rolling twelve months). Confirm with the accountant so no deductions are needed from contractor payments.
9. Reverse charge VAT and VAT registration of contractors: confirm which contractors are VAT registered so the check in step 3 is right.
10. Muzammel's role once the run is live: does he stay as the second bank authoriser?

Ops 07: Certificates and licences

1. Confirm the register in 5a: anything to add or remove, and whether the block items (fire, lifts, asbestos) sit here or in Ops 13.
2. Which properties are in a selective-licensing area today, and which councils. Claude can check each council once the address list is confirmed.
3. The spreadsheet: Zoho is the single source of truth (README rule 1), so the sheet should be a Google Sheet generated from the Zoho Landlord records, not typed by hand. Confirm.

4. Who the usual gas and electrical engineers are for each area, and whether Claude may book them without asking.
5. Payment list for engineers: build with Ops 06 as a weekly bank bulk-upload file.
6. Compliance check of all 160 let properties, 17 September 2026, is in 03-tenant-enquiries.md appendix C and 03-compliance-check-2026-09-17.csv: 5 gas and 5 EICR expired, 15 gas checks due by 11 November, insurance and licence dates stale on most records. Use it as the starting register once Damian confirms which gaps are real.

Ops 08: Email monitoring, every mailbox, every 15 minutes

1. **The existing hourly routine.** A Claude routine has been replying from admin@ and posting to Slack from Damian's account since about 15 September. Which platform is it on (Cowork or a routine), and can Damian switch it off the day the 15-minute routine starts, so two do not run together?
2. **Lettings@ send-as.** OpenRent only accepts replies from Lettings@propertyysauce.co. Fix, two minutes, only Damian or a Workspace admin can do it: in Gmail for admin@propertyysauce.co, Settings, Accounts, "Send mail as", Add another email address, enter Lettings@propertyysauce.co, untick "Treat as an alias" if asked, and confirm; because it is an alias on the same domain no verification code is needed. Until then every OpenRent applicant is unanswered by email and is posted to the viewings channel for the person with the OpenRent login.
3. **Inkbox number for Property Sauce.** Text and voice in step 6 need a UK Inkbox number on a Property Sauce identity. The only identity today is Luxe Stay on a US number. Damian to add the identity and number; until then step 6 point 6 applies.
4. **Rocky.** No Zoho Team record, no Slack account, no number on file. Until Damian supplies his full name, mobile and email, London urgent calls go to Vera, then Damian.
5. **Slack membership.** The office five are now in all four area channels (done 19 Sep 2026 through Slack in the browser; the connector cannot invite). Two people are in channels Damian's list excludes: Ali in #london-urgent and Dave in #catterick-urgent. They were added by someone before this operation, so they have been left in place; Damian to say whether to remove them. Rocky and Scander need Slack accounts to be in their channels at all.
6. **Notification settings.** No admin can set another member's channel notifications. The instruction has been posted in each channel; Damian to tell the team it is mandatory.
7. **Blackpool.** Not in Damian's list of areas. Ali covers it; proposed: it uses #catterick-urgent until it has enough properties for its own channel.
8. **Sure Lets scope.** Read-only for Property Sauce matters is proposed. Should Claude also answer Sure Lets' own mail, and if so in whose name?
9. **Digest destination.** #claudes-help is proposed. Damian may prefer a direct message or a new channel.
10. **Vera.** She is a Zoho user and on Slack but not on Damian's list for the urgent channels. Include her in #london-urgent?
11. **Where applicants are stored in Zoho** (open in Ops 03 section 10) decides which record step 5 writes to for an applicant. Until then, the note goes on the Landlord (property) record.

Ops 09: Notice, checkout and deposit return

1. **T1.** Approve the acceptance email and checklist below, or mark up changes.
2. **Shorter notice.** Damian said the Act makes it more lenient for tenants. The Act sets a tenant's minimum at two months (section 20), which is longer than the one month most periodic tenants gave before, but they can serve it from day one. Recommended rule: accept any earlier date the tenant asks for whenever a new tenant can start on or before it, because a vacant day costs more than a month of a departing tenant's rent is worth arguing over; hold them to the valid date only where the property will not re-let in time. If agreed, Claude applies that rule in step 3 without asking. Until then Damian decides each one.
3. **Lancaster House.** Damian said Ali today; Ops 05 (17 September) has Dave on Lancaster House repairs and inspections. Which is right for the day-one visit and the turnaround?
4. **Old X records.** Four of the twelve most recent X-renamed tenants still have `Status` Tenanted or Let Agreed, and one has no `Actual_Vacate_Date`. Shall this chat tidy every X record to Vacated with the date where it can be found on the record, and list the rest for the office?
5. **Water readings.** There is no `Water_Meter_Reading_Out` field. Add one (text, next to the electric and gas out fields)?
6. **Notice given status.** The Tenant `Status` picklist has no "Notice Given" value, so between notice and move-out the record still says Tenanted. Add "Notice Given" so the CRM list shows it without opening the record?
7. **Deduction limit.** £250 proposed as the amount Claude may put to a tenant without approval where each item is admitted or plain from the inventory. Confirm or change.
8. **Turnaround target.** Five working days from empty to keys ready. Confirm, and whether the in-house team's paint-and-clean cost is charged to third-party landlords (Ops 06).
9. **Deposit release.** Who logs into Mydeposits and TDS today, and does the office want Claude to prepare the release or claim so that person only clicks approve?
10. **Last month's rent from the deposit.** Tenants often ask. Assumed no unless Damian agrees in writing. Confirm.
11. **Law check.** The section numbers and the "end of a rent period or the day after" rule in section 3 were taken from a landlord guide, not from the Act. Re-read sections 20 and 21 of the Renters' Rights Act 2025 on legislation.gov.uk before the first live notice and correct this file if needed.
12. **Registering the register.** A Slack List or Canvas would hold the vacant properties as a table rather than a thread per message. Messages and threads are used first because they work today; switch if the channel gets busy.

Ops 10: Landlord statements and payouts

For Damian: For the office: download Virgin's payment file template from Business Internet Banking and save it to Drive "Accounts/Payment runs/virgin-template.csv"; confirm whether accounts@propertysaunce.co exists as a mailbox or alias; confirm whether any landlord bills are raised in a Books organisation other than Property Sauce.

1. **Payout rhythm:** Tuesday and Friday runs, with the promise "within three working days of the rent clearing", or keep paying the day it lands, or one fixed day a month? Recommendation: Tuesday and Friday.
2. **Who uploads:** the named team member who will download the file from Drive and upload it to Virgin, and whether Damian's own companies (Beaucatt, Beaumont, Lancaster, Murray & Sullivan, Tanc) are in the same runs.
3. **Statement day:** first working day of the month, as proposed?
4. **Greeting and address per landlord:** a first name and a statement email for each Established Landlord (Crackle: is it Aman, and which of the two addresses on the records?). Proposed: three new fields on the Landlord record, Statement_First_Name, Statement_Email, Management_Fee_Percent, set once per Established Landlord and copied to every property record.
5. **The payables backlog:** 214 unpaid landlord bills in Books, most surely paid. Who reconciles them, and by when? The pack cannot quote "held for you" until they are clean.
6. **VAT:** is Sure Lets and Manage Limited VAT registered? If so the bill must show VAT on the fee and the statement must show it separately. The sample assumes not.
7. **Non-resident landlords:** does any landlord live outside the UK? If yes, the NRL scheme applies to us as agent (20% deduction unless HMRC has approved gross payment on NRL1) and section 5d changes.
8. **Own-company landlords:** do Beaucatt, Beaumont and the rest want the same pack (useful for their accountants) or a shorter internal version?
9. **Sign-off:** the accounts team, or Damian by name on the smaller landlords?
10. **"Leonard":** is there a landlord called Leonard, or was that an example? No such name appears in Books or the CRM. For the office: download Virgin's payment file template from Business Internet Banking and save it to Drive "Accounts/Payment runs/virgin-template.csv"; confirm whether accounts@propertyysauce.co exists as a mailbox or alias; confirm whether any landlord bills are raised in a Books organisation other than Property Sauce.

Ops 11: Renewals and rent increases

1. **The percentage.** Confirm the rule in 5c: 6% capped at evidenced market, stop-and-ask below 3%. Or state a different default.
2. **Approval.** README rule 2 has a person on every notice. A  in Slack per notice is quick. Does Damian want Section 13 notices to go without a  once the test week is clean, or keep the  for good?
3. **Third-party landlords.** L11 requires a yes. Should silence after 14 days count as yes for landlords whose management agreement authorises rent reviews? Which agreements do?
4. **Rent day versus start day.** Around forty records pay on the 1st or 15th but started mid-month. The routine will read each agreement and record the period day; where an agreement is silent it uses the later date. Confirm, or tell the chat which day the office treats as the period start for Catterick House.
5. **Data to tidy before the backlog.** Records still marked Tenanted but renamed "X -" (Ops 09 lists them); Windmill Cottage with no start date; Flat 5 Lord Street (Serco) at £0; the four company lets marked Not

assured.

6. **Old agreements with a 6% clause.** Damian says the old agreements carried a 6% annual increase. The 50C North Birkbeck Road agreement of November 2022 (Rocket Lawyer) has no such clause: the rent is a fixed figure. If other agreements do have one it is void from 1 May 2026 and must not be applied; no action needed beyond not relying on it.
7. **Who signs.** The Form 4A "Landlord's Agent" line: the person who gives the , or always Damian?
8. **Universal Credit tenants.** Form 4A tells the tenant to report the change to DWP. Should S2 remind them, and should Ops 04 expect the housing element to lag by a month?

Ops 12: Complaints and redress

1. **Signature on stage 1.** Claude sends T1 to T5 as "Claude, for the Property Sauce team", as Ops 08 does, with the office number. A complainant who feels fobbed off by an automated reply gets crosser, so T2 and T4 say a person reviews anything they are not satisfied with and name Damian. Alternative: stage 1 goes out in the office's name or Usman's, still written and sent by Claude. Damian to choose.
2. **Timelines.** Proposed: acknowledgement in the sweep; stage 1 in three working days, or a holding update by day three and the response by day ten; stage 2 within ten working days of the request; final response within eight weeks of receipt at the latest. Confirm.
3. **Goodwill.** Proposed: Claude may recommend a goodwill gesture up to £50 (a rent credit or a voucher) in the summary, and Damian approves it with one tap in the thread; anything above £50, or any refund of a fee or rent, is a decision Damian makes on the file. Claude never offers money without the tap. A demand above £50 is also a handover trigger in step 8. Confirm the figure.
4. **The register.** Proposed: the existing Zoho Cases module, renamed "Complaints" in the tab, the Status picklist changed to the values in section 3, the custom fields added, and the four test records left in place or deleted as Damian says (README rule 2). Alternative: a new custom module. Cases is recommended because it already links to Contacts and Accounts.
5. **Slack.** Proposed: a new private channel #complaints with Damian, Usman, Muzammel, Hassan and Umar. Alternative: use #claudes-urgent for everything. A separate channel is recommended so that the monthly review and the quiet cases are not lost among lockouts.
6. **Published procedure.** The scheme expects members to have a written procedure available to consumers. Proposed: P1 below as a page at propertysauce.co/complaints, linked from the email signature next to the PRS number, sent in the tenancy welcome pack, and linked from every T2. Confirm the wording or mark up.
7. **Marchbank & Vale intake.** Which address receives T8 and the Drive share: casework@marchbankvale.co.uk is proposed. Does Marchbank & Vale already have a routine reading that mailbox that will take up a case automatically, or is that a build for the Marchbank & Vale side? Until it exists, Claude also tags Damian so a case is never sent into an unread inbox.
8. **Handover triggers.** Step 8 lists them. Two points for Damian: (a) a threat to go to the Property Redress Scheme is deliberately not a trigger on its own, because the scheme wants our procedure finished and a recovery firm writing to someone who has just said "I will complain to your redress scheme" reads badly if the scheme later sees the file; Claude readies the bundle instead. (b) A Case with a hardship or

vulnerability flag goes to Damian before handover, as arrears files do in Ops 04. Confirm both, or change.

9. **Complaints about landlords.** A tenant complaining about a third-party landlord's decision (a refused pet, a rent increase, a repair the landlord will not fund) is acknowledged by us and the landlord is told on day one. Does Damian want the landlord asked to answer, or Property Sauce to answer on their behalf with the landlord's instruction? The landlord ombudsman under the Renters' Rights Act will change this once it opens; this chat will check its status monthly and update section 3.
10. **Scheme rules.** The eight-week limit, the twelve-month referral window and the scheme's address in section 3 are from this chat's knowledge, not from the current PRS rules. Before the first live formal complaint, read the scheme's current rules and complaints guidance for members on theprs.co.uk and correct section 3, T6 and P1. The membership certificate for PRS058008 should be found and filed under Ops 07 with its renewal date.
11. **Applicants.** A holding deposit complaint from an applicant (the most common complaint in lettings) is handled by this file, but the Case's `Related_To` needs the applicant record that Ops 03 section 10 has not yet settled. Until then it links to the Landlord (property) record only.
12. **Luxe Stay.** Guest complaints at Saffron Walden and the Airbnb properties are out of scope here and follow the platform's process; a guest complaint arriving at admin@propertysausage.co is forwarded to the Luxe Stay mailbox and acknowledged. Confirm.
13. **Email to PDF.** Gmail's connector returns a thread's text and HTML but not a PDF. The bundle needs one PDF per thread, so the build is a small script (HTML from the thread, rendered to PDF with the headers, dates and attachments listed) run by the routine into subfolder 01. Until it exists, the thread is saved as an HTML file and the routine says so in the handover note.

Ops 13: Leasehold flats in other people's blocks

Not yet dictated; nothing written in the file.

Ops 14: Bookkeeping and reporting

1. **Which entities are Damian's.** The Established Landlord picklist has 19 names. Confirmed his: Beaucatt Homes Ltd, Beaumont Residential Ltd, Tanc Residential Ltd, D Murray & R Sullivan, Murray & Sullivan Invest Ltd, Damian Murray. To confirm: Michelle Murray, Harris & Murray Ltd, Lancaster Residential Group Ltd, and whether Sure Lets and Manage Ltd (Property Sauce), Luxe Stay, Montrose, Damian RBS, Gladioli House Management and Marchbank & Vale are separate books. Third-party landlords (Crackle, Snap, Pop, NSUK, D & D Homes, Array, Sturge East, North East, 101 Fortitude, Yusuf Loonat) get Ops 10 statements only, not bookkeeping.
2. **Which properties are in Damian's own name**, and whether Michelle Murray's holdings are in scope for the quarterly updates.
3. **The accountant:** name, firm, email, and which MTD software they submit through (Zoho Books is HMRC-recognised for VAT; for Income Tax the accountant needs to confirm, or a bridging tool is used from the sheet).
4. **Luxe Stay income:** holiday-let income is standard-rated for VAT, unlike residential rent, so whichever entity earns it has its own threshold to watch. Which entity is that?

5. **Sheets on Drive:** agreed as the accountant's copy, one workbook per entity per year with a tab per month, generated from Books. Confirm the Drive folder name and who else may see it.
6. **Backlog treatment** (section 5e, step 13): work forward from the current year first, with the accountant to rule on the older years. Yes?
7. **The weekly note:** Monday, by email, with a copy to Slack? And the day for the queries list.
8. **The "Accounting" section:** the proposal in the Ops 14 chat is a sidebar group named Accounting with one standing chat ("Accounting team") and a skill file holding the house rules (categories, thresholds, deadlines, the accountant's preferences); Ops 14's routine does the weekly work and writes to Books and the sheets, and the Accounting team chat reviews quarterly and at year end and produces the packs for the real accountant. To confirm.
9. **Feeds:** who reconnects the Deposit and Fee feeds, Gladioli's, and whether the two Murray & Sullivan accounts that stopped in 2023 are closed.

120 questions in total.
